Other	jQuery, Bootstrap, Materialize, Skeleton, Git, GitHub, RESTful web services, debugging in the browser, Rspec unit testing, MVC architectures, UX design
Creative Tools	Adobe Photoshop, InDesign, Draw; Sketch; Paper

Project Experience

Hivemind: A mental health and communication app using Twilio to send SMS messages
I designed wireframes, user stories + database models. I also used the twilio-ruby gem to enable users to text contacts from the app, bcrypt for authentication + authorization, and the Skeleton FE library.
Front end: Skeleton, Ruby | **Back end:** Ruby on Rails, Twilio SMS

Amplify Amplify: Winning widget for Ctrl-Alt-Del Hate Hackathon, Apr. 2017
Created web widget that was awarded 1st place in a social justice hackathon in collaboration with other General Assembly graduates. I configured our database using Firebase and defined the preliminary data structure for our product.
Front end: Bootstrap | **Back end:** Firebase

Wayfarer: A travel-blogging app
I set up our HTTP client using Axios; designed and built many of the app's views using React Component rendering; and created the schemas, log-in, and sign-up forms.
Front end: Javascript, jQuery, React, Materialize | **Back end:** NodeJS, MongoDB

Work Experience

Data + Evaluation Associate *Prospera Community Development*   *2014-15*

- Served as internal Salesforce (NPSP) system admin + point of contact for 3rd party contractors.
- Created and maintained program evaluation tools and templates, and technical documentation.

Executive Assistant + Hiring Coordinator *Piston Cloud Computing*   *2013-14*

- Managed 12+ external recruiting agencies and 100+ weekly applicants directly, doubling our team size in one year.
- Implemented diversity strategy, resulting in a 30% increase of female engineers.

Education

Web Development Program *General Assembly, San Francisco*
BA, Feminist Studies; BA, International Relations *University of California, Santa Barbara*
